(attach additional information to clarify)

### Site Profile for Contaminated Sites

Pursuant to the *Waste Management Act*, an applicant is required to submit a completed "Site Profile" on properties that are/were used for purposes indicated in Schedule 2 of the *Contaminated Sites Regulations*. Please indicate if:

- yes    no  
        the property has been used for commercial or industrial purposes; and,
- yes    no  
        soil removal is required as part of this proposed permit.

If **both** of these are applicable (yes), consult with Schedule 2 to determine if a Site Profile is necessary and indicate below. Additional information regarding contaminated sites is available from the Municipality or at <http://www.env.gov.bc.ca/epdiv/>.

- A Site Profile is required. A \$100 processing fee shall be submitted to the Municipality with a completed site profile.
- A Site Profile is not required.

### Information Required for Submission

*It is the responsibility of the applicant to consult with staff to determine the information required for a complete application. Processing begins only when an application is certified as complete. Additional information may be requested during application review.*

Information	Details	
<b>Copy of Certificate of Title</b>	Current copy, including relevant covenants, rights-of-way and easements	
<b>Site Plan*: Existing Conditions within the Development Permit Area</b>  metric scale only	Owner	
	Civic & legal address	
	North arrow and scale	
	Property lines, rights-of-way, easements	
	Existing buildings and structures and their setbacks	
	Existing water lines, wells, septic fields, sanitary sewer & storm drain facilities	
	Existing driveways, sidewalks, paths, fences, retaining walls, docks/landings, hard surfaces and any other permanent features	
	Trees (including species and diameter at breast height)	
	Landscaped areas (lawn and gardens)	
	Areas of native plant communities	
	The following information may also be required, depending on the location and scope of the proposed changes: <ul style="list-style-type: none"> <li>• High water mark of the stream;</li> <li>• Top of the ravine bank (if the stream is located in a ravine);</li> <li>• Streamside Protection and Enhancement Area boundary; and</li> <li>• Development Permit Area boundary.</li> </ul>	
<b>Site Plan*: Proposed Changes within the Development Permit Area</b>  metric scale only	Owner	
	Civic & legal address	
	North arrow and scale	
	Dimensions of property lines, rights-of-way, easements	
	Proposed changes.	
		The following information may also be required, depending on the location and scope of the proposed changes: <ul style="list-style-type: none"> <li>• High water mark of the stream;</li> <li>• Top of the ravine bank (if the stream is located in a ravine);</li> <li>• Streamside Protection and Enhancement Area boundary; and</li> <li>• Development Permit Area boundary.</li> </ul>
<b>Building Plans</b>	Complete set of building plans (if applicable)	

\* Based on the scope of the project and the distance of the proposed work from the high water mark of the stream or the top of the ravine bank, a professional surveyed site plan may not be required. All site plans must be accurate and to scale. 1:500 scale site plans are recommended.

### Additional Requirements

- Storm water management statement (if applicable)
- Photographs of the area to be altered
- Impact Studies:** *The applicant may be required to commission an impact study completed by a professional biologist, geo-technical engineer or other qualified professional, depending on the scope and nature of the proposed work. Applicants are responsible for all costs associated with independent studies.*
