

Colquitz River Linear Trails

The linear trail concept was first envisioned by the Provincial Capital Commission in 1967. The concept was endorsed by Saanich Council in 1968 and land acquisition by Saanich began shortly thereafter. This 24 km trail is still in the process of completion as part of the Regional Trail System extending from Beaver Lake to Portage Inlet. The completed sections are a reminder of the constant changes of nature's seasons and cycles.
